- PE Cover Supervisor salary contribution £7691
- Swimming £3500
- Bikeability £1600
- Lunchtime and after school activities and resources £1500
- School games, transport, cross curricular initiatives £5000
- Contingency £500 (Yoga Bugs)

At Rood End, we have spent and allocated the money in a variety of ways to ensure that all our pupils have the resources to make progress through quality learning experiences. This year, we have attempted to focus on improving the children's mindset, balance and core skills. We have invested in Yoga Bugs, initially to assist the children that were taking their SATS, giving them relaxing strategies and coping techniques. We then made this a whole school focus so that all children have the opportunity to benefit from this.

We've also invested in a 'Maths on the Move', which is a Maths-themed Sports programme, aimed at filling in gaps in the children's learning in a more physical and fun way for them.

We invested some money with external providers ASPIRE and Multi Bugs to assist with providing quality after-school clubs and lunch-time clubs.

We also invested in providing children from KS1 upwards with the opportunity to learn to swim through quality teaching at Langley Swimming Baths.

We allocated some money to use transport to travel to external tournaments in order to continue our commitment to achieving the School Games Gold mark for a fourth consecutive year.

We invested in a large amount of equipment for use in Physical Education sessions and also for lunchtime and break time supervisors to use.

Unfortunately, due to the Covid 19 pandemic, we have been unable to ascertain the full impact of our Sports Premium expenditure. Although we weren't able to gain any quantitative data, we used teachers' initial observations of children's physical abilities alongside assessments made by our sports coach to set targets and areas for improvement for 2020 - 2021.
